GREAT FUTURES START HERE.

BOYS & GIRLS CLUBS
OF SAN DIEGUITO

The Boys and Girls Club of San Dieguito Aquatics Department will be performing our annual maintenance duties during the time frame of August 21-28.

A major part of this annual process includes the draining and refilling of our two pools. This process of changing out our pool water is important in order to maintain healthy water quality for our many users. Draining the pools will also allow us to replace our federally mandated pool drain covers and perform other needed repairs on our pool shells.

We are aware of the sensitivities involved in this process, especially during this time of water shortages in our area. For this reason, we are working closely with the city and the Santa Fe Irrigation District, and we are following all protocols involved with this process.

Beginning on the evening of Friday, August 21, we will begin the process of draining the pools. The pool water will be neutralized from pool chemicals prior to the draining process. The water will drain to local storm drains and will have no harmful effects on our environment. We will drain only the necessary amounts needed to effectively change out our pool water. Finally, we will be following all guidelines provided to us by the City of Solana Beach and the SF Irrigation District.

Sincerely,
Marineke Vandervort
Executive Director
Boys & Girls Clubs of San Dieguito
