

Dear Valued BGC Aquatics Patron,

We would like to let you know that a mandatory roofing repair project has been scheduled at our facility beginning December 5<sup>th</sup>. Construction will affect all programming at the Pardee Aquatics Center through January 15<sup>th</sup>, 2023. We have an urgent need to upgrade and repair our gymnasium and Clubhouse roofs at three of our locations. Our current roofs are original, some dating back as early as 1969 and they are all in desperate need of repairs.

Based on the preliminary construction schedule, there are several dates in December when our facility will be closed as we will be considered an active construction site. We have tried to schedule closure dates to coincide with normal holiday closures to minimize the impact while making every effort to remain open as much as safely possible.

As with any construction project, our pool schedule will likely change. Please frequently check your email or visit our website for the most up-to-date schedule information before coming to the pool. To view our tentative pool schedule for lap and Masters swim for December and January, please visit [bgcsandieguito.org/lap-masters](http://bgcsandieguito.org/lap-masters) and scroll down to the "Schedules" section.

Additionally, we will have limited parking onsite during the construction. The back and side parking lots to our facility will be fenced off, and the only entrance to our facility will be through the lobby doors and pool gates. The locker rooms and restrooms should remain open when the pools are open, but we will be prioritizing the safety of our patrons and we encourage swimmers to be prepared should these areas need to close at any time.

For our monthly and quarterly membership pass holders, we will add time back to your membership pass for all closure dates due to construction.

Thank you for your cooperation and understanding. Should you have any questions, please call Boys & Girls Clubs of San Diego Pardee Aquatics Center at 858.755.4904.

Sincerely,

BGC Aquatics Staff
